SUMMARY

Security researcher and full-stack/AI engineer pursuing an MSc in Information Security. Design and secure systems that protect people — natural-language processing (NLP) against disinformation, computer-vision exam integrity, and secure web platforms — combining hands-on engineering with a threat-modelling mindset. First Class graduate, published researcher, and UNDP Tech4Peace cybersecurity fellow.

CORE SKILLS

Languages: Python, Java, JavaScript, PHP, C++, SQL
Security: Penetration testing (Metasploit), vulnerability assessment, SIEM, cryptography, network security, threat modelling, OSINT
AI / Machine Learning: NLP, BERT, LSTM, TensorFlow, PyTorch, scikit-learn, OpenCV
Web & Cloud: React, Node.js, Next.js, Django, Firebase, Amazon Web Services (AWS), Microsoft Azure, Docker, Git

EXPERIENCE

- AI & Software Engineer Intern** — 3rd Eye Vision Technology Jul 2022 – Sep 2023
- Engineered a logistics-tracking tool in Python and Django within an Agile team, improving client workflow efficiency by 25%.
 - Prototyped computer-vision models (OpenCV, TensorFlow) for gesture recognition, supporting assistive-technology and smart-city use cases.
- Android Developer** — PHN Technology Pvt Ltd Mar 2023 – Jun 2023
- Delivered 3 production Android applications (Java, XML) end-to-end, reducing user-reported bugs by roughly 30% through structured testing.
- Front-End Developer Lead** — CodeX Club, GITAM University 2022 – 2023
- Led student teams across 5+ web projects aligned to the UN Sustainable Development Goals, mentoring 6+ junior developers and raising UI/UX quality.

SELECTED PROJECTS

- FakeAlert** — NLP against disinformation 2024 – 2025
- Built a fake-news and hate-speech classifier (LSTM and BERT) reaching up to 98% accuracy, engineering bias measurement, adversarial robustness, and privacy as first-class controls; basis of a published paper.
- ProctoShield** — secure exam-integrity system 2023
- Developed an AI-assisted proctoring system (OpenCV, Verhoeff algorithm, NLP) that reduced exam fraud by 40% in pilots; won 3rd place (₹20,000) at National HackFest, India.
- KamerLark** — AI-powered student-housing platform (Founder) 2022 – Present
- Founded and shipped a full-stack platform (PHP, SQL, JavaScript) with AI roommate-matching; secured a ₹100,000 grant and launched with 500+ active users.
- CityMIL** — UNESCO media-literacy platform 2023
- Led a 5-person team across 5 countries to build an interactive media-literacy web app; won the Global Team Award at the UNESCO Youth Hackathon 2023.

EDUCATION

- MSc, Information Security** — ITMO University, Saint Petersburg, Russia Sep 2025 – Present
- Coursework: cryptography, cybersecurity analysis, network security, machine learning. Open Doors scholarship.
- BCA, Computer Applications** — GITAM University, Bengaluru, India Sep 2021 – Apr 2024
- CGPA 8.7/10, First Class with Distinction; Outstanding Achiever 2024. Thesis on NLP for detecting fake news and hate speech.

CERTIFICATIONS

Certified Ethical Hacker (CEH) · ISC2 Certified in Cybersecurity (CC) · Microsoft Security, Compliance & Identity Fundamentals (SC-900) · Microsoft Azure Fundamentals (AZ-900) · Microsoft Azure AI Fundamentals (AI-900) · Google Cybersecurity Professional · AWS Academy — Cloud Architecting & Cloud Foundations · IBM Introduction to AI · UNDP Tech4Peace Cybersecurity Fellow (2025)

PUBLICATIONS

- NLP in the Digital Age: Combating Fake News, Hate Speech & Ethical Risks for Social Integrity** — 2025, SSRN preprint, DOI 10.2139/ssrn.5181145.
- From Data to Action: Empowering African Youth in the Climate Crisis** — forthcoming.

HONORS & LANGUAGES

UNDP Tech4Peace Cybersecurity Fellow (2025) · Outstanding Achiever, GITAM (2024) · 3rd place, National HackFest (2023) · UNESCO Youth Hackathon Global Team Award (2023) · Open Doors Scholarship, ITMO (2025) · Study in India Fully-Funded Scholarship (2021). **Languages:** English and French (native), Russian (B1), German (basic).
